

**Veer Narmad South Gujarat University, Surat**  
**Bachelor of Computer Application (B.C.A.(Honours))**  
**Under the Faculty of**  
**Computer Science and Information Technology**

<b>Name of Program:</b>	Bachelor of Computer Application (Honours)
<b>Abbreviation:</b>	B.C.A.(Honours): Four-year Integrated Program.  With Multi-Level Entry and Exit option
<b>Multi-level Exit Criteria:</b>	<p>i) Under Graduate Certificate in Computer Application: If the student wish to exit after completion of First year ( Semester-1 and Semeter-2 ) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship in addition to 6 credits from skill-based courses earned during first and second semester.</p> <p>ii) Diploma in Computer Application: If the student wish to exit after completion of Second year (Semester-1 to Semeter-4) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship offered at end of first or second year in addition to 6 credits from skill-based courses earned during first four semesters.</p> <p>iii) B.C.A. (Bachelor's in Computer Application): If the student wish to exit after completion of Third year (Semeste-1 to semester-6) without any back-log and secure additional 4 credits from work based skill oriented university approved courses /vocational courses / summer internship / Apprenticeship offered at end of first or second year in addition to 6 credits from skill-based courses earned during first four semesters.</p>
<b>Multi-Level Entry Criteria:</b>	As per the norms of the Veer Narmad South Gujarat University.
<b>Duration:</b>	4 year of B.C.A.(Honors) degree program with multi-level exit options at 1 <sup>st</sup> , 2 <sup>nd</sup> and 3 <sup>rd</sup> Year to obtain Certificate, Diploma, Degree and Honours Degree in Computer Application respectively.
<b>Eligibility:</b>	<p>Candidate must have passed standard 12th (H.S.C.) Examination in Science (Any Group) / Commerce / vocational / General stream from Gujarat Higher Secondary Board (G.H.S.E.B.) or any other equivalent board (C.B.S.E. / I.C.S.E. / NIOS etc. which must be approved and possess equivalence certificate from Veer Narmad South Gujarat University) with English as one of the subject.</p> <p>In case of candidates passed out from 12th Board from General Stream; having English as one of the subjects. In case of Students passed out with 12th (H.S.C.) vocational stream, Computer and English must be one of the subject.</p>
<b>Objective of the Program:</b>	Bachelor of Computer Application (BCA)(Honours) is undergraduate degree program in computer application area. Objective of the program is to open a channel of admission for courses in the field of Computer Science,

	<p>Applications and all relevant fields of information technologies to build career for students who have completed standard 12th (H.S.C.) and are interested in taking computing/computer Application and Information Technology as a career.</p> <p>Main objective is to equip the students with strong foundation in computer programming languages, coding, database handling, software application developments, problem-solving skills and development of analytical and logical skills. The focus is to introduce various programming languages on different platforms and operating systems, interaction with databases available on various platforms, software testing, and development and deployment techniques. It also aim to provide knowledge in latest trends and advancements in field of computer technologies.</p> <p>The program caters to the needs of the students aspiring to excel in the field of computer science, applications and technologies. The program is designed to develop computer professionals versatile in almost all field of computer application. It also aim to enhance communication and interpersonal skills.</p>
<b>Program Outcome:</b>	<p><b>PO1:</b> Ability to analyze a problem, identify and define the Computing requirements appropriate to its solution.</p> <p><b>PO2:</b> Enhancing the problem solving, logical, reasoning and analysis capabilities of a problem and integrate the ability with the coding using specific computer programming languages.</p> <p><b>PO3:</b> To generate Understanding regarding the core and fundamental ideas about the computer platforms, operating systems, software design concepts, networking concepts and advanced and emerging technologies.</p> <p><b>PO4:</b> Design, implement and evaluate a computer-based system, processing, component or program to meet desired goal with the help of various programming languages, application software, packages, tools, databases on various platforms.</p> <p><b>PO5:</b> An ability to apply design and development principles in construction of software systems of varying complexity using various algorithmic principles, modeling, coding and design of computer-based systems.</p> <p><b>PO6:</b> Prepare the aspiring students to become computer software professionals who can work in corporate/software industry at entry to advanced level as well as independent developers.</p> <p>Overall, the program outcomes aim to produce graduates who are: (a) competent in computer application, development and design. (b) Adapt to changing technology and industry trends. (c) Can make significant contributions to the software applications coding, designing, database managements, testing, deployments and ready to adapt any upcoming technologies.</p>

<b>Program Specific Outcome:</b>	<p><b>PSO1:</b> Developing understanding about the fundamentals of core concepts of logic developments, critical thinking and problem solving capabilities. Emphasis on effective communication.</p> <p><b>PSO2:</b> Improving analytical and applied concepts using various technologies, coding concepts and implementation of coding to solve the problems.</p> <p><b>PSO3:</b> Development of team building concepts and working in team with positive approach, enhancing the mindset to contribute as an individual to the team. Improving interpersonal skills.</p> <p><b>PSO4:</b> Improving student's Understanding related to technical problems and enhancing their capabilities to address the problems to turn into solutions through various possible ways by enhancing critical thinking ability.</p> <p><b>PSO5:</b> Develop students to capabilities for self-learning, skill development through self-practicing and problem solving abilities.</p> <p><b>PSO6:</b> Develop students to address and work on the real-world problems as an individual and as part of team. Understand the business problems and ability to work on their solutions by applying various software technologies.</p> <p><b>PSO7:</b> To enhance development skills at various level including problem analysis, data analysis, logical and critical analysis of the problems and implementing the solutions by imparting various recent and upcoming technologies.</p> <p><b>PSO8:</b> Enhance the passion among the students for updating knowledge, innovative ideas, upskilling and implementing the knowledge in applied areas and research areas by understanding the real world problems, addressing the real world problems and their possible solutions that lead to build a successful Professional career.</p>								
<b>PO and PSO mapping:</b>		PSO1	PSO2	PSO3	PSO4	PSO5	PSO6	PSO7	PSO8

<b>Medium of Instruction:</b>	English								
<b>Program Structure:</b>	Semester-wise Breakup of the course is given as follows :								

# Veer Narmad South Gujarat University, Surat

## Program Structure: T.Y.B.C.A. (SEM – 5 and SEM – 6)

(w.e.f. Academic Year June, 2025-2026)

### Bachelor of Computer Application (B.C.A.) – Three Year Program

### Bachelor of Computer Application (B.C.A.(Hon.)) – Four Year Integrated Program

Program Structure		Semester-wise break up for the courses :				
SEMESTER – 5						
Course Code	Course Title	Course Category	Level of Course	Course Credits	Teaching Hours/week	
				Th.+Pra.	Theory	Practical/Fieldwork /Project/ Internship
501	Linux Operating System (LOS) (Minor-04)	Minor Corse	200-299 Intermediate Level Course	4	3	2
502	Network Technology (Minor-05)	Minor Course	200-299 Intermediate Level Course	4	4	0
503-01	Advance Web Designing (Major-11-01)	Major Course	400-499 Advanced Courses	4	2	4
OR						
503-02	Advance Mobile Technology-I (Major-11-02)	Major Course	400-499 Advanced Courses	4	2	4
504	Web Framework and Services (Major-12)	Major Course	400-499 Advanced Courses	4	2	4
505	.NET Technology (Major-13)	Major Course	400-499 Advanced Courses	4	2	4
	Project-01 (Based on course code: 503-01/503-02)	Project will be developed in group of maximum three students based on approved definition by the concerned faculty members. The project report will be submitted by the students regularly. The final evaluation will be based on Project presentation, E-report and viva-voce.				
	Project-02 (Based on course code: 504)	Project will be developed in group of maximum three students based on approved definition by the concerned faculty members. The project report will be submitted by the students regularly. The final evaluation will be based on Project presentation, E-report and viva-voce.				
	Practical (Based on Course Code:501 and 505)	Students will prepare separate practical journals for both courses. The final Practical exam/viva-voce will be based on Courses-501 and 504 separately.				
506	<b>Skill Enhancement Course-V (SEC-05)</b> [The student will undergo field training/ internship training <u>OR</u> Select minimum one University approved and recognized 2 credit certificate course from the skill based courses list offered by the respective institute/department. / approved MOOC courses as per the guidelines of KCG] (The student need to enrol separately and pay the fees as decided by the respective institute/department)	Skill Enhancement Course	200-299 Intermediate Level Course	2	2	-
Other Activities	The student is expected to participate in activities related to National Service Scheme (NCC), National Cadet Corps (NCC), adult education/literacy initiatives, mentoring school students, Elderly literacy program/ Environment preservation activities and other similar activities.			-	-	-
Total				22	15	14

Course Code	Course Title	Course Credit	University Exam Type	Exam Duration	External Marks	Internal Marks	Total Marks
501	Linux Operating System (LOS) (Minor-04) **	4	Theory/ Written : Practical :	1 Hours 2 Hours	25 25	25 25	100
502	Network Technology (Minor-05)	4	Theory/ Written	2 Hours	50	50	100
503-01	Advance Web Designing (Major-11-01)**	4	Theory/ Written : Project :	1 Hours	25	25	100
503-02	Advance Mobile Technology-I (Major-11-02)**			2 Hours	25	25	
504	Web Framework and Services (Major-12)**	4	Theory/ Written : Project :	1 Hours 2 Hours	25 25	25 25	100
505	.NET Technology** (Major-13)	4	Theory/ Written : Practical :	1 Hours 2 Hours	25 25	25 25	100
506	Skill Enhancement Course-V# (SEC-05)	2	-	-	25	25	50#
Total		22			275	275	550

#### For Practical and Project:

- Batch Size: Maximum 40 students can be accommodated in a batch. Separate batch should be considered if the student strength exceed 45 numbers.
- Practical includes Lab. sessions for course-501 and course-505.
- Project hours includes Lab. sessions of 2 Hours each for the course-503-01/503-02 and course 504 per week. The students can work on project in-house/out-house as per their internal guide's guidance. Group of maximum three students can work on a project definition. One Internal Project guide will be allocated to each group. Each group is expected to work minimum 4 hours each on Project-1 and Project-2 per week. Out of which 2 hours will be in supervised mode and balance hours in un-supervised mode.
- The Practical journal/Project final reports must be certified by the concerned faculty and by the Head of the Department, failing which the student will not be allowed to appear for External Practical/Project Examination. Student will submit softcopy of Project duly certified by the internal guide.

**Internship:** A student who wish to exit after successfully completion of Third year (Semester-5 and Semester-6) without any backlog is required to obtain Four credits at the end of the year either through the internship/field-work or university approved two skill based certificate courses(two courses of 2-credits each or one 4-credit course). Student is required to enrol for the certificate courses separately by paying the course fees as decided by the college/institute. For Internship, the Institute/college will grant the permission and evaluate the training outcomes. Based on satisfactory completion of the internship training, the Institute head will recommend to the university to grant four credits for summer training. [All expenses for the internship/skill course/field-work will be bear by the student.]

**Skill Enhancement Course:** As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit skill enhancement course out of the choices given by the college/institute (From available basket of courses as per University norms) or 2-credit MOOCs approved by the KCG. It will be mandatory for the student to opt minimum one 2-credit Skill enhancement/2-credit KCG approved MOOCs courses out of offered courses recognised by University during semester-1 to semester-5.

(If a student chooses to pursue an SEC (Skill Enhancement Course) other than the one offered by the institute/college—which is a 2-credit course approved as per the norms of KCG and NEP-2020—they must enroll for it separately, fulfill all necessary requirements, and submit a valid completion certificate in order to earn the required SEC credits.)

**# Marks:** : The students will enrol for the course from the given university approved list of certificate courses offered by the respective college/department. The student will select and enrol separately for any of the offered list of courses at college/department/institute and obtain respective credits. The institute will evaluate the performance (preferably continuous evolution) as per the SOP of certificate courses and on successfully completion of the course, the student will be eligible to obtain respective credits for the course. These credits will be considered and reflect in student's mark-sheet as well as in ABC(Academic Bank of Credit). These courses are mandatory and student is required to obtain the specified credits in process to acquire the certificate/diploma/degree.

**\*\* Minor/Major Practical based Subjects:** Course 503-01/503-02,504 and 505 are 4-credit major courses consists of two components: Theory and Practical/Project. Course-501 is minor course and carry 4 credits consists of two components: Theory and Practical.

For Course-503-01/503-02 and Course-504: 2 Hours of Theory and 4 hours of Project contact hours per week are allocated.

For Course 501: 3 Hours of theory and 2 hours of practical per week are allocated.

For Course 505: 2 Hours of theory and 4 hours of practical per week are allocated.

Major courses carry 100 marks of exam weightage (50 theory and 50 practical/project). External and Internal distribution of marks are in ratio of 50:50 respectively. Students are required to acquire minimum passing marks from theory and practical collectively.

Practical exams: For Course-501 (2 hours duration), course-505(2 hours duration) and 25 marks each.

<p>Project Exam: For course-503-01/503-02 and Coruse-504 – Separate project presentation and viva-voce will be conducted. External Theory/Practical/Project exam marks (25 marks each for course-501, course-503-01/503-02,504 and 505.)</p> <p>Division of marks for External Practical: Exam evaluation: 20 marks + Viva-voce: 5 Marks.</p> <p>Students are required to pass in both components (Theory and Practical/Project) collectively for course 501, 503-01/503-02, 504 and 505 as combined head (Theory + Practical/Project). It is mandatory for Students to appear for internal and external theory and practical exams for all courses. Similarly, In case a student remain absent in any of the component of Theory or Practical of minor/major course, the student will be considered fail.</p>	
<b>Program Passing Rules:</b>	As per University rules.
<p>Program Fees :</p> <p>(Per Semester)</p> <p>(One time fees and exam fees are additional as prescribed by the university)</p> <p>(w.e.f. Academic Year : 2025-26)</p>	<p>Semester Tuition Fees : As per norms of University</p> <p>Semester Laboratory Utilization fees : As per norms of University</p> <p>[Other one time /affiliation /exam fees, will be as per the norms of the University]</p> <p>[The fees for all certificate courses, Skill Enhancement Courses / Value Addition Courses; fees will be as per the prescribed limit for per credit as per the SOP of certificate courses decided by the university.]</p>
Internal Marks Distribution :	<p>For All Theory subjects ( Out of 25) :</p> <p>Home Assignment ( 3 marks ) + Class Assignment (3 Marks) + Attendance (4 Marks) + Internal Test (15 marks)</p> <p>For All Practical/Project subjects ( Out of 25) :</p> <p>Lab. work ( 3 marks ) + Lab. Journal (3 Marks) + Attendance (4 Marks) + Internal Test (15 marks)</p> <p>For All Theory subjects ( Out of 50) :</p> <p>Home Assignment ( 6 marks ) + Class Assignment (6 Marks) + Attendance (8 Marks) + Internal Test (30 marks)</p> <p>For All Practical/Project subjects ( Out of 50) :</p> <p>Lab. work ( 6 marks ) + Lab. Journal (6 Marks) + Attendance (8 Marks) + Internal Test (30 marks)</p>

[Subject Code for theory- 2511000905044001]

[Subject Code for Practical-2511000905044002]

**Course Code: 501**  
**Course Title: Linux Operating System**

Course Code	501								
Course Title	Linux Operating System (LOS)								
Credits	4								
Course Category	Minor Course								
Level of Course	200-299 ( Intermediate Level )								
Teaching per Week	4 Hrs. ( 3 Hours Theory + 2 Hours Practical work )								
Minimum Hours/ Semester	45 hours of Theory + 15 Hours of Practical (Including class work, examination, preparation etc.)								
Review / Revision	-								
Implementation Year:	A.Y. 2025-2026								
Purpose of Course	Learn the architecture and features of Linux systems. Get familiar with the Linux file system, processes, and user management. Use basic and advanced Linux commands for file manipulation, text processing, permissions, networking, etc., Navigate the file system, manage files/directories, and control user access.								
Course Objective	1. Understand the structure, design, and usage of Linux systems. 2. Gain hands-on experience with commands for file handling, process control, text processing, and system management. 3. Learn how to write, debug, and execute shell scripts using Bash or other shells to automate tasks. 4. Understand file types, directory structures, permissions, and access control. 5. Concepts of background/foreground jobs. 6. Use standard input/output effectively for chaining commands and redirecting data streams. 7. Apply logic and scripting to solve practical problems and streamline system operations.								
Pre-requisite	Understanding of operating systems, files, and general computer usage, Basic understanding of variables, loops, conditionals, and functions, Experience with any programming language (like C, Python, or Java) is helpful but not always required, Concepts like processes, memory, and file systems give a better context to Linux systems.								
Course Outcomes	CO1: Understand: Explain the structure and components of Linux systems. CO2: Apply: Use Linux commands for file handling, text processing, and system tasks. CO3: Create: Write and execute shell scripts to automate operations. CO4: Analyze: Analyze file types, permissions, and directory structures. CO5: Apply: Use redirection and pipes to control input/output streams.

**Course Title: Network Technology**

Course Code	502									
Course Title	Network Technology (Minor-5)									
Credits	4									
Course Category	Minor Course (Minor-05)									
Level of Course	200-299 ( Intermediate Level Course )									
Teaching per Week	4 Hours									
Minimum Hours per Semester	60 hours of Theory (Including class work, examination, preparation etc.)									
Review / Revision	-									
Implementation Year:	A.Y. 2025-2026									
Purpose of Course	To provide students with a foundational understanding of computer networks, covering basic concepts, architectures, protocols, and services. It aims to equip learners with the knowledge of both traditional and emerging network technologies, including Internet, Intranet, and Mobile Ad hoc Networks (MANET), essential for careers in Computer and IT industries.									
Course Objective	1) To introduce students to the fundamental concepts and types of computer networks and topologies. 2) To explain the architecture and functioning of the Internet and Intranet, including various networking devices and media. 3) To explore the structure and functions of the OSI model and important network protocols. 4) To provide knowledge of modern networking trends such as Mobile Ad hoc Networks (MANET), VANET, FANET, and SPANC. 5) To demonstrate the working of application layer services such as email communication and web access through case studies.									
Pre-requisite	Learner should have a basic understanding of computer fundamentals and operating systems. Familiarity with hardware components and general internet usage will be beneficial for better comprehension of networking concepts.									
Course Outcomes	<b>CO1</b> (Remembering & Understanding): Identify and describe types of computer networks, topologies, and related terminologies. <b>CO2</b> (Understanding & Applying): Explain the working of Internet and Intranet and identify common networking devices and cables. <b>CO3</b> (Understanding & Applying): Describe Mobile Ad hoc Networks (MANET, VANET, SPANC, FANET) and explain the OSI model and its layers. <b>CO4</b> (Applying): Apply knowledge of networking protocols, data packets, and addressing schemes (IP, HTTP, HTTPS) in basic scenarios. <b>CO5</b> (Analyzing): Analyze the role of application layer services in email communication and URL structure. <b>CO6</b> (Evaluating & Creating): Evaluate how different network protocols function across layers and create logical interpretations of data flow in web and email transactions.

<b>Credits</b>	4									
<b>Course Category</b>	Major Course									
<b>Level of Course</b>	400-499 (Advance Level)									
<b>Teaching per week</b>	2 Hours Theory + 4 Hours of Lab/interactive Project work.									
<b>Minimum Hours per Semester</b>	90 Hours ( 30 Hours Theory + 60 Hours of Project work (Including class work, examination, preparation etc.)									
<b>Review / Revision</b>	-									
<b>Implementation Year:</b>	A.Y. 2025-2026									
<b>Cognitive Skills of the Course</b>	Understand the technical foundations, as well as the non-programming / administrative skills needed to be a successful web developer. This course reveals the reasons why a truly successful website developer does more than write code. The course deals with both the Frontend (client-side) and Backend (server-side) of a tech product. This course deals with designing of websites and building the Applications.									
<b>Course Objective</b>	The students will learn the whole React WebApp building process, from pc to the server. They will work with NoSQL databases. They will learn the whole process of building your App using React.js. At the end of the course, they will develop modern, complex, responsive and scalable web applications with Angular.									
<b>Pre-requisite</b>	Paper-305-01 (Web Designing -I) in Semester-3. Paper-405-01 (Web Designing -II -2) in Semester-4.									
<b>Course Outcomes</b>	<b>CO1 (Understanding):</b> Understand core concepts of web development and their applications in modern digital environments. <b>CO2 (Understanding &amp; Applying):</b> Identify career relevance of web technologies in development, design, and entrepreneurship. <b>CO3 (Applying):</b> Apply knowledge through hands-on exercises to build interactive and functional websites. <b>CO4 (Analyzing):</b> Analyze user and system requirements to plan and structure effective web solutions. <b>CO5 (Creating):</b> Develop responsive, scalable, and modern websites using appropriate design and coding practices. <b>CO6 (Understanding &amp; Applying):</b> Understand and implement key client-side and server-side components in web development.

	CO6									
<b>Course Content</b>	<b>Unit-1: Concepts of NoSQL: MongoDB</b> 1.1 concepts of NoSQL. Advantages and features. 1.1.1 MongoDB Datatypes (String, Integer, Boolean, Double, Arrays, Objects) 1.1.2 Database creation and dropping database 1.2 create and Drop collections 1.3 CRUD operations (Insert, update, delete, find, Query and Projection operators) 1.4 Operators (Projection, update, limit(), sort()) and Aggregation commands  <b>Unit-2: Fundamentals of React.js</b> 2.1 Overview of React 2.1.1 Concepts of React. 2.1.2 Using React with HTML 2.1.3 React Interactive components: Components within components and Files 2.1.3 Passing data through Props 2.2 Class components									

	<p>2.2.1 React class and class components</p> <p>2.2.2 Conditional statements, Operators, Lists</p> <p>2.2.3 React Events: Adding events, Passing arguments, Event objects</p> <p>2.3 Forms: (Adding forms, Handling forms, Submitting forms)</p> <p>2.3.1 event.target.name and event.Target.event, React Memo</p> <p>2.3.2 Components (TextArea, Drop down list (SELECT))</p> <p>2.4 Hooks: Concepts and Advantages</p> <p>2.4.1 useState, useEffect, useContext</p> <p>2.4.2 useRef, useReducer, useCallback, useMemo</p> <p>2.4.3 Hook: Building custom hook, advantages and use</p> <p><b>Unit-3: Fundamentals of Angular</b></p> <p>3.1 Concepts and Characteristics of Angular</p> <p>3.1.1 Key Concepts</p> <p>3.1.1.1 TypeScript Overview, Component-based Architecture</p> <p>3.1.1.2 Modules, Services, Dependency Injection</p> <p>3.2 Routing and Navigation3</p> <p>3.2.1 Setting up Development Environment, Installing Node.js and Angular CLI, Creating and Running Angular Projects, Project Structure and Angular Workspace</p> <p>3.3 Angular Core Features</p> <p>3.3.1 Angular Components, Creating Components (@Component)</p> <p>3.3.2 Component Lifecycle Hooks</p> <p>3.4 Component Communication (Input, Output, EventEmitter)</p> <p>3.4.1 Angular Directives, Structural Directives: *ngIf, *ngFor, *ngSwitch</p> <p>3.4.2 Attribute Directives: ngClass, ngStyle</p> <p>3.5 Custom Directives</p> <p>3.5.1 Angular Data Binding</p> <p>3.5.2 Interpolation, Property Binding, Event Binding, Two-way Binding with [(ngModel)]</p> <p>3.6 Angular Pipes (Filters in Angular)</p> <p>3.6.1 Built-in Pipes: uppercase, lowercase, currency, date, percent, titlecase, slice, Creating Custom Pipes</p> <p>3.7 Angular Forms (Template-driven Forms, Reactive Forms, Form Validation)</p> <p>3.8 Angular Services and Dependency Injection</p> <p>3.8.1 Creating and Injecting Services, Using HttpClient to call REST APIs</p> <p>3.8.2 Observables with RxJS</p> <p><b>Unit-4 : Indian knowledge system of Mathematics :</b></p> <p>4.1 Ancient Indian Arithmetic from Lilavati Samhita by Bhaskarachary-I:</p> <p>4.1.1 Arithmetic rule : Sutra (Verse 1)</p> <p>4.1.2 Multiplication of Large Numbers: Sutra (Verse 5)</p> <p>4.1.3 Division: Sutra (Verse 8):</p> <p>4.2 Ancient Algebra and Geometry operations from Lilavati Samhita:</p> <p>4.2.1 Algebra : Sutra (Verse 13)</p> <p>4.2.2 Geometric Relationships: Sutra (Verse 17)</p> <p>4.2.3 Understanding Lilavati Samhita theorem later taught as Pythagorean theorem (Geometry): Sutra (Verse 23)</p> <p>[Implementation of all sutras in computer Lab. Using C / Python / Any other Prog. Language.]</p> <p>[Project development will be based on Unit-1 to Unit-3]</p>

<b>Teaching Methodology</b>	Class Work, Discussion, Lab work, Self-Study, Seminars and/or Assignments, Practical implementation, Application development, Project development
<b>Evaluation Method</b>	<p>50% Internal assessment. :</p> <ul style="list-style-type: none"> <li>- Attendance, Class and home Assignment, Unit tests.</li> <li>- Project demonstration/presentation, viva-voce</li> </ul> <p>50% External assessment. :</p> <ul style="list-style-type: none"> <li>- Theory/Written examination</li> <li>- Project demonstration/presentation, viva-voce</li> </ul>

**Course Code: 503-02****Course Title: Advance Mobile Technology - I**

Course Code	503-02								
Course Title	Advance Mobile Technology-I (Major-11-02)								
Credits	4								
Course Category	Major Course								
Level of Course	400-499 ( Advance Level )								
Teaching per Week	2 Hours Theory + 4 Hours of Interactive Project work								
Minimum Hours per Semester	90 Hours ( 30 Hours Theory + 60 Hours of Project work (Including class work, examination, preparation etc.)								
Review / Revision	-								
Implementation Year:	A.Y. 2025-2026								
Purpose of Course	The course is aim to give knowledge about Kotlin, object-oriented concept of Kotlin. This course also enhances knowledge of JSON, Intent and storing data into database. It also aims to understand concepts accessing current location and device camera.

<b>Teaching Methodology</b>	Class Work, Discussion, Lab work, Self-Study, Seminars and/or Assignments, Practical implementation, Application development, Project development. Students will develop a project based on the course content during the semester. The project exam will be conducted at the end of the semester.
<b>Evaluation Method</b>	50% Internal assessment. : - Attendance, Class and home Assignment, Unit tests. - Project demonstration/presentation, viva-voce 50% External assessment. : - Theory/Written examination - Project demonstration/presentation, viva-voce

**Course Code: 504****Course Title: Web Framework and Services**

Course Code	504								
Course Title	Web Framework and Services (Major-12)								
Credits	4								
Course Category	Major Course								
Level of Course	400-499 ( Advance Level )								
Teaching per Week	2 Hours Theory + 4 Hours of Applied Project work								
Minimum Hours per Semester	90 Hrs. ( 30 Hours Theory + 60 Hours Project work/Applied work )								
Review / Revision	-								
Implementation Year:	A.Y. 2025-2026								
Purpose of Course	The purpose of this course is to equip students with practical skills in developing dynamic, data-driven web applications using PHP and modern web frameworks like CodeIgniter and Laravel. It aims to build a strong foundation in server-side scripting, MVC architecture, database integration, and RESTful services to prepare students for real-world web development.

1.3 Data Types and Operators
1.3.1 Primitive types: string, int, float, boolean
1.3.2 Arrays and objects
1.3.3 Type casting and type juggling
1.3.4 Operators: arithmetic, logical, comparison, assignment
1.4 Control Structures and Arrays
1.4.1 Conditional statements: if, else, elseif, switch
1.4.2 Looping constructs: for, while, do-while, foreach
1.4.3 Arrays: indexed, associative, multidimensional
1.4.4 Array operations: sort(), asort(), ksort(), array_merge()
1.5 Functions and Form Handling
1.5.1 Creating and invoking user-defined functions
1.5.2 Function parameters and return values
1.5.3 Variable scope: global vs. local
1.5.4 Handling forms with \$_GET and \$_POST
1.5.5 Basic input validation and sanitization
<b>Unit 2: Advanced PHP and File Management</b>
2.1 File Handling and Directories
2.1.1 Including files using include and require
2.1.2 File operations: fopen(), fread(), fwrite(), fclose()
2.1.3 File upload using \$_FILES and move_uploaded_file()
2.1.4 File download using PHP headers
2.1.5 Directory operations: opendir(), readdir(), mkdir(), rmdir()
2.2 Forms, Filters, and JSON
2.2.1 Designing and handling HTML forms
2.2.2 Server-side validation techniques
2.2.3 PHP filters: filter_var() and constants
2.2.4 Parsing and generating JSON with json_encode() and json_decode()
2.3 Cookies, Sessions, and Emails
2.3.1 Creating and accessing cookies using setcookie() and \$_COOKIE
2.3.2 Session management with session_start() and \$_SESSION
2.3.3 Sending emails using the mail() function
2.3.4 Email formatting: headers, subject, attachments
2.4 OOP and Exception Handling in PHP
2.4.1 Creating classes and objects
2.4.2 Using constructors and property visibility
2.4.3 Inheritance and method overriding
2.4.4 Exception handling: try, catch, finally, throw
2.4.5 Input validation using regular expressions
<b>Unit 3: Database Interaction and CodeIgniter Framework</b>
[Codeigniter ver.4.4 or higher is recommended]
3.1 PHP with MySQL/MongoDB
3.1.1 Connecting to databases using mysqli or PDO
3.1.2 Creating databases and tables
3.1.3 Executing CRUD operations: INSERT, SELECT, UPDATE, DELETE
3.1.4 Using clauses: WHERE, ORDER BY, LIMIT
3.2 AJAX for Backend Integration
3.2.1 Introduction to AJAX and asynchronous requests
3.2.2 Sending AJAX requests to PHP
3.2.3 Real-time search functionality
3.2.4 JSON data exchange with JavaScript and PHP
3.3 CodeIgniter Introduction
3.3.1 Installing and configuring CodeIgniter (CI4)
3.3.2 Understanding MVC architecture in CodeIgniter
3.3.3 Creating models, views, and controllers
3.3.4 URL routing and default controller setup
3.4 Core Features in CodeIgniter
3.4.1 Form validation using CI validation library
3.4.2 Session management andflashdata
3.4.3 Handling file uploads
3.4.4 Loading helpers and libraries
<b>Unit-4 : Indian knowledge system on Astronomy :</b>
4.1 Ancient Indian Astronomy from Suryasidhdhanta by Aryabhata:

	4.1.1 Motion of the Earth: Sutra (Verse 3.9) 4.1.2 Length of the Year : Sutra (Verse 3.10) 4.1.3 Lunar and Solar Eclipses: Sutra (Verse 4.5) 4.1.4 The Motion of Planets : Sutra (Verse 1.13) 4.1.5 The Influence of the Sun on Planetary Motion: Sutra (Verse 2.12) 4.1.6 Zodiac and Signs: Sutra (Verse 1.5) 4.1.7 Solar System: Sutra (Verse 1.15) 4.1.8 Speed of Planets: Sutra (Verse 6.5) 4.1.9 Planetary Distances from earth to moon: Sutra (Verse 7.8) 4.1.10 Latitude and Longitude of Planets : Sutra (Verse 8.12) 4.2 Ancient Indian Astronomy by Varahmihir : 4.2.1 On Lunar Phases : Sutra (Verse 2.10) 4.2.2 On the Movements of the Stars : Sutra (Verse 2.18) 4.2.3 Ecliptic Latitude and Longitude 4.2.4 Sidereal and Tropical Years 4.2.5 Planetary Conjunctions and Aspects [Unit-4: Students will prepare a presentation on assigned topics and prepare a detailed report on given topic. Students will present the topic and submit the report as part of their final evaluation.] [Project development will be based on Unit-1 to Unit-3]

**Course Code: 505**

**Course Title: .Net Technology**

Course Code	505									
Course Title	.Net Technology (Major-13)									
Credits	4									
Course Category	Major Course									
Level of Course	400-499 ( Advance Level )									
Teaching Hours	90 Hrs. ( 30 Hours Theory + 60 Hours Applied/Practical work )									
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)									
Review / Revision	-									
Implementation Year:	A.Y. 2025-2026									
Purpose of Course	The purpose of this course is to introduce students to ASP.NET, a robust server-side web development framework by Microsoft, enabling them to build dynamic, interactive, and data-driven web applications. It aims to provide foundational knowledge of web forms, server controls, state management, database access using ADO.NET, and basic web services, preparing students for real-world enterprise-level web development.

**Course code: 506**  
**Course Title: Skill Enhancement Course (SEC-05)**

<b>Course Code</b>	506
<b>Course Title</b>	Skill Enhancement Course - V ( SEC – 05 )
<b>Credit</b>	2
<b>Category of Course</b>	Skill Enhancement Course
<b>Level of Course</b>	200-299 ( Intermediate )
<b>Teaching per Week</b>	2 Hrs (Any or Combination of Theory/Practical/Fieldwork/Internship/Project)
<b>Minimum weeks per Semester</b>	15 (Including class work, examination, preparation etc.)
<b>Review / Revision</b>	-
<b>Implementation Year:</b>	A.Y. 2025-2026
<b>Purpose of Course</b>	<ul style="list-style-type: none"> <li>- As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit Skill Enhancement Course out of the choices given by the college/institute.</li> <li>- It will be mandatory for the student to opt minimum one 2-credit Skill Enhancement Course from the course baskets of Skill Enhancement courses approved by the university or from any recognized MOOC or from recognised university through online mode subject to transfer of credit through ABC during semester-1 to semester-5.</li> <li>- The student can start an alternative career in the field by obtaining higher degree of knowledge in the area.</li> <li>- It's aimed at imparting practical skills, embedded internship, hands-on training, soft skills, life skills, such approved online courses etc. to enhance the employability of students. This may also include courses as per the need of new evolving technology.</li> </ul>
<b>Course Objective</b>	Obtaining skill in particular field along with the regular curriculum of the selected program is essential. It not only enhance the skill but also provide an opportunity to develop skill in particular area where one can pursue career in future. Skill enhancement provides the opportunity and knowledge for an individual to develop and strengthen the necessary skills to gain, maintain, and advance in a chosen area. Skill enhancement programs are focused around training that combines the best practices from varieties of areas as described in NEP-2020 SOP by Gujarat State Higher education Department's SOP. Skill enhancement or training typically uses a combination of cognitive and behaviour problem solving approaches, both of which are used to strengthen a person's positive skill develop.
<b>Pre-requisite</b>	-
<b>Course Content and Implementation road-map.</b>	<ul style="list-style-type: none"> <li>(i) University has categorised and prepared the basket of the courses including approved online courses that can be offered as Skill Enhancement Course.</li> <li>(ii) The institute/college/department can design and implement skill enhancement course by getting approval from the relevant apex body of the university considering the SOP of the certificate course policies of the University.</li> <li>(iii) The institutes/college/departments can select more than one course out of the given sets of courses and offer them to their students.</li> <li>(iv) The students can select any of the courses offered by the institute/college/department from the given choices and enrol for the course.</li> <li>(v) The institute/college/department will arrange appropriate resource person(s) for the course.</li> <li>(vi) The course evaluation will be taken place at the college/institute/department level based on the nature of the course.</li> <li>(vii) The institute/college/department will assess the student based on the nature of the course. The student will be granted the credits on successful completion of the course.</li> </ul>
<b>Reference Books</b>	<ul style="list-style-type: none"> <li>- The reference materials and books will be decided by the Institutes/Colleges/Departments based on the selected Courses.</li> <li>- Minimum five copies of relevant topics are recommended to keep in the library.</li> </ul>
<b>Teaching Methodology</b>	Class Work/ Discussion/ Self-Study/ Seminars/ field works/ practical training/ field work and/or Assignments.

<b>Evaluation Method</b>	50% Internal assessment. 50% External assessment. (Evaluation and Assessment will be carried out based on the nature of the course. On successful completion of the course, the student will be granted 2 credits.)
--------------------------	---

### University Examinations

Course Code	Course	Exam Component	Max. Marks	Duration
501 (Minor-4)	Linux Operating System (LOS)	Theory	25	1 Hours
		Practical	25	2 Hours
502 (Minor-5)	Network Technology	Theory	50	2 Hours
503-01 (Major-11-01) <b>OR</b> 503-02 (Major-11-02)	Advance Web Designing <b>OR</b> Advanced Mobile Technology	Theory	25	1 Hours
		Project Presentation	25	-
504 (Major-12)	Web Framework and Services	Theory	25	1 Hours
		Project Presentation	25	-
505 (Major-13)	.NET Technology	Theory	25	1 Hours
		Practical	25	2 Hours
506 (SEC-05)	Skill Enhancement Course	Theory/Practical	25	Evaluation and Assessment will be carried out based on the nature of the course opted by Student.

**Internship:** Student willing to exit the program at the end of the two semesters and to avail the Certificate in Computer Application or exit the program at the end of the first four semesters and to avail the Diploma in Computer Application, it is essential to acquire four credits from internship. A key aspect of the internship is induction into actual work situations. Internships involve working with local industry, government or private organizations, business organizations, artists, crafts persons, and similar entities to provide opportunities for students to actively engage in on-site experiential learning. In option to these internships, the student can avail such four credits by availing two 2-credit university approved courses during any of these semesters. The student is required to enroll and avail these 4-credits and produce the evidence in process to opt the multi-level exit option after successfully completion of first year ( two semester ) or second year(four semesters).

#### For Practical and Project:

- Batch Size – 40 Maximum (Desirable). Maximum 45 students can be accommodated in a batch. Separate batch should be considered if the student strength exceed 45 numbers.
- Practical includes Practical sessions for course-602 and course-603-01/603-02. **Minimum** 60 hours of Practical/Project hours each for course-602 and course-603-01/603-02 should be allocated per batch. Out of which 30 hours will be in supervised mode and balance hours in un-supervised mode.
- Students will create an application (in-house project) for course 602 and course-603-01/603-02 as project. Their practical/project assessment will be based on the mini-project(application) developed for the concerned courses 602 and course-603-01/603-02 in terms of demonstration, presentation and viva-voce. E-project report should be prepared by the students which must be certified by the concerned faculty and by the Head of the Department, failing which the student should not be allowed to appear for External Practical/project Examination. Student will submit softcopy of Minor Project duly certified by the internal guide.

**Major Course :** Major discipline is the main focus (Core) dominant subject and the degree will be awarded in that discipline. Students must secure a prescribed number of credits (50% of total credits) through core courses in the major discipline. Students can choose the courses from the pool of courses. The number of courses (subjects) in Major may vary from semester to semester.

**Minor Course :** Minor discipline is the broader understanding course beyond the major discipline course. It contains generic-electives for students to choose from the pool of courses. It helps students to gain broader knowledge in addition to relevant major disciplines courses as per their choices. Minor subjects may be from same or different disciplines. Student may make choices according to their interest/need, from ODL courses also.

**Internship:** A student who wish to exit after successfully completion of first year (Semester-1 and Semester-2) without any backlog is required to obtain Four credits at the end of the year either through the summer internship or university approved skill based certificate courses(two courses of 2-credits each or one 4-credit course). Student is required to enrol for the certificate courses separately by paying the course fees as decided by the college/institute. For summer training, the Institute/college will grant the permission and evaluate the training outcomes. Based on satisfactory completion of the summer training, the Institute head will recommend to the university to grant four credits for summer training. The Internship/summer training/skill based certificate courses will be an audit course.[The internship cost/fees will be bear by the student.]

**Ability Enhancement Course (AEC):** To be offered to students to achieve competency in a Modern Indian Language and English Language focused on language and communication skills. It may be a major specific course. The Credit allocated

for these courses is 10 credits of total credits for 3 years' bachelor's degree and four years' bachelor's degree programme. The courses can be selected by the college/institute from available basket of approved 2-credit certificate courses provided by the university.

**Skill Enhancement Course :** As per NEP(National Education Policy-2020), it is mandatory for students to select a 2 credit skill enhancement course out of the choices given by the college/institute (From available basket of courses as per University norms). It will be mandatory for the student to opt minimum one 2-credit Skill enhancement course out of offered courses recognised by University during semester-1 to semester-5.

(The student need to enrol separately and pay the fees as decided by the respective institute/department)

**# Marks: :** The students will enrol for the course from the given university approved list of certificate courses offered by the respective college/department. The student will select and enrol separately for any of the offered list of courses at college/department/institute and obtain respective credits. The institute will evaluate the performance (preferably continuous evolution) as per the SOP of certificate courses and on successfully completion of the course, the student will be eligible to obtain respective credits for the course. These credits will be considered and reflect in student's mark-sheet as well as in ABC(Academic Bank of Credit). These courses are mandatory and student is required to obtain the specified credits in process to acquire the certificate/diploma/degree.

[The student is required to pay separately for these courses as prescribed by the college. The college will decide the fees for these courses based on the University norms/SOP for certificate course/credit fees.]

**\*\* Major Applied Subjects:** Course 602 and 603-01/603-02 are major courses consists of two components: Theory and Practical/Project. These courses are carrying 4 credits.

For Course-602 : 30 hours of Theory and 60 hours of practical work per semester are allocated.

For Course 603-01 / 603-02: 30 hours of Theory and 60 hours of practical work per semester are allocated.

Major courses carry 100 marks of exam weightage (50 theory and 50 project/practical). External and Internal distribution of marks are in ratio of 50:50 respectively. Students are required to acquire minimum passing marks from theory and practical collectively.

Project viva-voce for course-602, course-603-01 / course-603-02 will be conducted.

External Theory and Practical/Project exam marks (25 marks each for course-602, course-603-01/603-02)

Division of marks for External Project course-602, course-603-01 / course-603-02:

Project Demonstration and presentation evaluation: 20 marks + Viva-voce: 5 Marks.

Internal and External Major-Project Presentation (Course-604) : 50 Marks (Presentation/Code explanation/project Demonstration)

Project Demonstration and presentation evaluation: 35 marks + Viva-voce: 10 Marks + Project E-Documentation : 5 Marks

Students are required to pass in both components (Theory and Practical/Project) collectively for course 602,603-01/603-02 as combined head (Theory + Practical) for each major course. It is mandatory for Students to appear for internal and external theory and practical exams for all courses. Similarly, In case, a student remain absent in any of the component of Theory or Practical of particular major subject, the student will be considered fail for that particular major subject.

[It is recommended to complete the theory exams of 601 to 603 between 10<sup>th</sup> and 15<sup>th</sup> of February. (between 10<sup>th</sup> and 15<sup>th</sup> August for Winter session)].

<b>Program Passing Rules:</b>	As per University rules.
<b>Program Fees :</b> (Per Semester) (One time fees and exam fees are additional as prescribed by the university) (w.e.f. Academic Year : 2025-26)	Semester Tuition Fees : As per the norms of University Semester Laboratory Utilization fees : As per norms of University [Other one time /affiliation /exam fees, will be as per the norms of the University] [For all certificate course fees, Skill Enhancement Courses and Value Addition Courses fees will be as per the prescribed limit for per credit as per the SOP of certificate courses decided by the university.]

Course Code	601-02									
Course Title	Concepts of A.I. and IoT Devices (Minor-6-02)									
Credits	4									
Course Category	Minor Course									
Level of Course	200-299 ( Intermediate Level )									
Teaching Hours	60 Hours									
Minimum Hours/ Semester	60 hours of Theory (Including class work, examination, preparation etc.)									
Review / Revision	-									
Implementation Year:	A.Y. 2025-2026									
Purpose of Course	The purpose of this course is to provide students with a foundational understanding of Artificial Intelligence (AI) and the role of Internet of Things (IoT) devices in enabling AI applications. It aims to introduce key concepts, tools, and real-life integrations of AI and IoT, preparing students for further learning or project-based exploration in this emerging interdisciplinary field.									
Course Objective	1) To introduce the basic concepts and history of Artificial Intelligence (AI). 2) To explain key AI techniques such as search algorithms, machine learning, and expert systems. 3) To familiarize students with IoT devices and their architecture. 4) To explore how IoT devices collect and transmit data for AI applications. 5) To discuss real-world use cases integrating AI with IoT in domains like healthcare, agriculture, and smart cities. 6) To encourage understanding of the challenges and future scope of AI-enabled IoT systems.									
Pre-requisite	Basic knowledge of computer fundamentals and an introductory understanding of programming or logic-building concepts is recommended. No prior experience with AI or IoT is required.									
Course Outcomes	<b>CO-1 Remembering:</b> Recall and define key concepts, history, and types of Artificial Intelligence and IoT technologies. <b>CO-2 Understanding:</b> Explain the architecture, components, and connectivity methods of IoT systems used in AI applications. <b>CO-3 Applying:</b> Apply AI algorithms to process real-time data collected from IoT devices for smart decision-making. <b>CO-4 Analyzing:</b> Analyze challenges related to data quality, latency, power consumption, and security in AIoT systems. <b>CO-5 Creating:</b> Design and present innovative AIoT solutions based on case studies and group collaboration.

Course Category	Minor Course									
Level of Course	200-299 ( Intermediate Level )									
Teaching Hours	60 Hours									
Minimum Hours/ Semester	60 hours of Theory (Including class work, examination, preparation etc.)									
Review / Revision	-									
Implementation Year:	A.Y. 2025-2026									
Purpose of Course	The purpose of the Computer Graphics course is to introduce students to the fundamentals of graphical systems, display technologies, and graphic standards. It enables students to apply algorithms and geometric transformations to create and manipulate basic graphical objects.									
Course Objective	1) Define the key concepts, application areas, and file formats used in computer graphics. 2) Explain the working principles of various video display devices and scanning techniques. 3) Apply line drawing algorithms to generate basic graphic primitives like lines and circles. 4) Analyze the effects of geometric transformations such as scaling, rotation, translation, reflection, and shearing. 5) Create simple graphic designs by integrating graphical objects and transformation techniques.									
Pre-requisite	The prerequisite for the Computer Graphics course is a basic understanding of programming concepts and mathematical foundations such as coordinate geometry and matrix operations.									
Course Outcomes	<b>CO-1:Remembering:</b> Recall the application areas, file formats, and graphic standards used in computer graphics systems. <b>CO-2:Understanding:</b> Describe the architecture and functioning of various display devices, scan methods, and graphic object types. <b>CO-3:Applying:</b> Implement standard line drawing algorithms such as DDA and Bresenham for rendering basic graphic primitives. <b>CO-4:Analyzing:</b> Analyze the behavior and effects of geometric transformations like scaling, rotation, translation, reflection, and shearing on 2D objects. <b>CO-5:Creating:</b> Construct and manipulate graphical objects by integrating transformations and rendering techniques for simple graphic applications.

**Course Code: 602**  
**Course Title: Data Analytics using Python**

Course Code	602									
Course Title	Data Analytics using Python									
Credits	4									
Course Category	Major Course									
Level of Course	400-499 ( Advance Level )									
Teaching Hours	30 Hours of class-room teaching + 60 Hours of Applied work(Project)									
Minimum Hours/ Semester	30 hours of Theory + 60 Hours of Applied work (Project) (Including class work, examination, preparation etc.)									
Review / Revision	-									
Implementation Year:	Only during A.Y. 2025-2026									
Purpose of Course	This course aims to introduce students to data analytics techniques using Python, with a focus on Exploratory Data Analysis (EDA), regression, and supervised learning. It equips learners with practical skills in handling data, automating EDA, and applying machine learning concepts in real-world scenarios.									
Course Objective	1)Explain the concepts and techniques of exploratory data analysis including handling missing data, outliers, and distribution types. 2) Apply Python libraries like Pandas and NumPy to automate and perform efficient data analysis tasks. 3) Describe the basics of regression and correlation, and understand their role in data analysis and machine learning. 4) Understand key concepts of machine learning including types, benefits, and real-world applications. 5) Evaluate supervised learning models using loss functions such as MSE and MAE, and explain concepts like overfitting and underfitting.									
Pre-requisite	Students should have a basic understanding of Python programming and core concepts of statistics and probability. Familiarity with libraries like Pandas and NumPy will be helpful but not mandatory.									
Course Outcomes	CO1:Understanding: Explain key concepts of exploratory data analysis, including univariate, bivariate, and multivariate techniques, and describe data distributions. CO2:Applying: Use Python libraries like Pandas and NumPy to perform and automate exploratory data analysis on various datasets. CO3:Analyzing: Analyze relationships between variables using regression techniques, and interpret covariance and correlation in datasets. CO4:Understanding & Applying: Describe the types and benefits of machine learning, and apply basic ML lifecycle steps to real-world problems. CO5:Evaluating: Evaluate supervised learning models using loss functions such as MSE and MAE, and assess issues like overfitting and underfitting.

Course Code	603-01																																			
Course Title	Fundamentals of Full Stack Web Development																																			
Credits	4																																			
Course Category	Major Course																																			
Level of Course	Advance level																																			
Teaching per Week	2 Hours Theory + 4 Hours of Project work																																			
Minimum Teaching Hours per Semester	90 Hours (Theory + Project work) (Including class work, Project work, preparation etc.)																																			
Review / Revision	-																																			
Implementation Year:	A.Y. 2025-2026																																			
Cognitive Skills of the Course	The course enhances analytical thinking by guiding students through the structure and logic of web application development. Learners develop problem-solving skills as they design, debug, and improve client-server interactions. It fosters the ability to break down complex tasks into manageable components, encouraging modular and structured thinking. Students also gain the ability to evaluate and choose appropriate tools and approaches for frontend, backend, and database integration.																																			
Course Objective	This course introduces students to the fundamentals of full stack web development using Angular, Express.js, and Firebase. Learners will gain hands-on experience building single-page applications (SPAs) using Angular, setting up backend servers with Express.js, and integrating cloud-based databases using Firebase Firestore. The course emphasizes core concepts such as routing, forms, data binding, and basic CRUD operations. Students will understand how frontend and backend components interact in a modern web application. By the end of the course, learners will be able to build simple yet functional web apps and connect them to a real-time database. The focus remains on conceptual clarity, practical application, and foundational skills development.																																			
Pre-requisite	305-01: Web Designing -1 course of Semester-3. 405-01: Web Designing -2 course of Semester-4. 503-01: Advanced Web Designing – I																																			
Course Outcomes	<p><b>CO1:</b> The skills acquired in this course are highly transferable and applicable in a wide range of professional settings.</p> <p><b>CO2:</b> Whether students aim to become web developers, designers, or entrepreneurs, proficiency in web development technologies is invaluable.</p> <p><b>CO3:</b> Through hands-on projects and exercises, they will gain practical experience in building real-world solutions.</p> <p><b>CO4:</b> Students will be able to develop modern, complex, responsive and scalable websites.</p> <p><b>CO5:</b> Understand necessary functionalities and elements of client and server-side development of website.</p> <table><tr><th>Unit</th><th>Remember</th><th>Understand</th><th>Apply</th><th>Analyze</th><th>Evaluate</th><th>Create</th></tr><tr><td>Unit 1</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td><td>✓</td></tr><tr><td>Unit 2</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td></tr><tr><td>Unit 3</td><td></td><td>✓</td><td>✓</td><td>✓</td><td></td><td>✓</td></tr><tr><td>Unit 4</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td><td>✓</td></tr></table>	Unit	Remember	Understand	Apply	Analyze	Evaluate	Create	Unit 1	✓	✓	✓			✓	Unit 2	✓	✓	✓	✓			Unit 3		✓	✓	✓		✓	Unit 4	✓	✓	✓			✓

<b>Minimum Hours per semester</b>	90 Hours (Including class-room teaching, Applied work and project development work, examination, preparation etc.)
<b>Review / Revision</b>	-
<b>Implementation Year:</b>	A.Y. 2025-2026
<b>Cognitive Skills of the Course</b>	The course is aim to give knowledge about Firebase. This course enhances knowledge of Firebase Authentication and datastorage storing data into database. It also aims to understand concepts API and Web Services.
<b>Course Objective</b>	1) To introduce students to Firebase and its integration with Android Studio for developing secure mobile applications. 2) To enable learners to implement various Firebase Authentication methods including email/password, Google, and Facebook logins. 3) To equip students with the ability to perform real-time data storage, retrieval, and CRUD operations using Firebase Realtime Database and Firestore. 4) To familiarize students with web services and RESTful APIs for building connected Android applications. 5) To provide hands-on experience in handling API requests and responses using Volley and JSON parsing in Android.
<b>Pre-requisite</b>	Paper-305-02 (Mobile Application Development -1) in Semester-3. Paper-405-02 (Mobile Application Development -2) in Semester-4. Paper-501-02 (Advanced Mobile Computing – I) in Semester-5.
<b>Course Outcomes</b>	<b>CO1:</b> Understand: Understand and explain the functionalities and services provided by Firebase in the context of mobile application development. <b>CO2:</b> Apply: Apply Firebase Authentication mechanisms to build secure and user-friendly Android apps with email/password and social logins. <b>CO3:</b> Apply: Demonstrate the ability to store, read, and update data in Firebase Realtime Database using Android apps. <b>CO4:</b> Analyze: Analyze and handle API responses using RESTful architecture, JSON parsing, and Volley libraries in Android. <b>CO5:</b> Create: Develop a fully functional Android application integrating Firebase services and REST APIs to perform real-world tasks like user login, data sync, and backend interaction.

<b>Implementation Year:</b>	A.Y. 2025-2026
<b>Purpose of Course</b>	This course is designed to provide students with the opportunity to apply the knowledge and skills they have gained throughout their academic journey in web design, mobile applications, and web technologies. It encourages hands-on learning by developing a real-world, full-scale project through self-exploration of technologies, structured documentation, and effective presentation.
<b>Course Objective</b>	1) Understand and analyze the given project definition and plan development accordingly. 2) Apply learned and self-acquired knowledge of technologies in designing and implementing project solutions. 3) Demonstrate the use of appropriate tools, frameworks, and platforms in project development. 4) Develop a well-structured project document covering all phases of the development life cycle. 5) Present the project effectively using professional communication and presentation tools.
<b>Pre-requisite</b>	Students must have completed foundational and intermediate courses in web design, mobile application development, and web technologies. They should be familiar with programming languages (such as HTML, CSS, JavaScript, Web-technologies/Mobile Technologies, Python, or Java), database concepts, and basic software development practices. Prior experience with mini-projects or assignments involving real-world problem-solving is desirable.
<b>Course Outcomes</b>	<b>CO1:</b> Analyze: Students will be able to analyze project requirements, identify suitable tools, and prepare an implementation strategy. <b>CO2:</b> Create: Students will develop full-fledged applications using relevant web, mobile, or hybrid technologies. <b>CO3:</b> Apply: Students will gain experience in applying the Software Development Life Cycle (SDLC) to real-world problems. <b>CO4:</b> Create: Students will prepare and submit a comprehensive project report that meets academic and professional standards.

	CO5:Evaluate: Students will present their project solutions confidently and clearly to technical and non-technical audiences.																
Project Development	<b>STEP-1: Project Planning and Definition</b> 1.1 Understanding Problem Statement 1.2 Feasibility Study and Requirement Analysis 1.3 Technology Stack Selection (Web, Mobile, Cloud, Database) 1.4 Project Scheduling and Team Role Allocation  <b>STEP-2: Project Design and Architecture</b> 2.1 System Design – High Level and Low Level 2.2 Database Design and ER Diagram 2.3 UI/UX Planning and Wireframing 2.4 Data Flow Diagram and Architecture Diagram  <b>STEP-3: Project Development</b> 3.1 Frontend Development 3.2 Backend Development 3.3 Integration with Database and External APIs 3.4 Testing: Unit Testing, Integration Testing, User Acceptance Testing  <b>STEP-4: Documentation and Deployment</b> 4.1 Preparing Project Documentation: SRS, Design Document, User Manual 4.2 Deployment on Hosting Platforms (like Firebase, Heroku, GitHub Pages, etc.) 4.3 Project Report Writing in Standard Format 4.4 Preparing and Delivering Project Presentation [ Students will submit E-Document for Project report. One internal guide will be allocated for every ten groups All groups are required to contact their internal guides once a week to endorse their project progress work.]																
	Project Evaluation Scheme	<table><tr><td>Component</td><td>Marks</td></tr><tr><td>Problem Definition and Planning</td><td>10%</td></tr><tr><td>Design and Architecture</td><td>15%</td></tr><tr><td>Implementation and Functionality</td><td>30%</td></tr><tr><td>Testing and Deployment</td><td>15%</td></tr><tr><td>Documentation</td><td>10%</td></tr><tr><td>Final Presentation &amp; Viva</td><td>20%</td></tr><tr><td>Total</td><td>100%</td></tr></table>	Component	Marks	Problem Definition and Planning	10%	Design and Architecture	15%	Implementation and Functionality	30%	Testing and Deployment	15%	Documentation	10%	Final Presentation & Viva	20%	Total

<b>Credits</b>	2
<b>Course Category</b>	AEC Course
<b>Level of Course</b>	100-199 ( Fundamental Level )
<b>Teaching Hours per semester</b>	30 Hours of class-room work
<b>Minimum Hours/ Semester</b>	30 hours of Class-room work (Including class work, interactive sessions, examination, preparation etc.)
<b>Review / Revision</b>	-
<b>Implementation Year:</b>	A.Y. 2025-2026
<b>Purpose of Course</b>	The purpose of this course is to equip students from the software, computer, and IT industry with essential project execution, documentation, and presentation skills. It aims to enhance their technical communication, soft skills, and interview preparedness through hands-on project work, seminars, and structured evaluations.
<b>Course Objective</b>	<ol style="list-style-type: none"><li>1) To develop students' ability to plan, execute, and manage software/IT projects using industry-standard practices.</li><li>2) To enhance technical documentation skills through structured project reports and software documentation.</li><li>3) To build confidence in delivering effective oral presentations and technical demonstrations relevant to software and IT domains.</li><li>4) To improve soft skills such as teamwork, time management, and problem-solving in a professional IT project environment.</li><li>5) To prepare students for technical and HR interviews by practicing mock interviews and resume-building activities.</li></ol>
<b>Pre-requisite</b>	Learners should have a fundamental understanding of programming languages, web or mobile application development, database management, and software development life cycle. Prior exposure to mini-projects or hands-on experience with development tools and technologies used in the IT/software industry will be beneficial.
<b>Course Outcomes</b>	<b>1)CO1:(Understand):</b> Explain the essential components of professional project documentation and communication in the software and IT industry. <b>2)CO2:(Apply):</b> Demonstrate the ability to present project concepts clearly using structured presentation techniques and visual aids relevant to IT solutions. <b>3)CO3:(Analyze):</b> Evaluate the technical and soft skill requirements of various IT job roles and align personal project work and presentation accordingly.

	4)CO4:(Create): Develop a mini-project or prototype by integrating appropriate software tools and technologies and document it as per standard industry practices. 5)CO5:(Evaluate): Justify design choices, tool selection, and development approach during interviews or viva presentations using logical reasoning and industry-specific language.

<b>Level of Course</b>	400-499 ( Advance Level )
<b>Teaching Hours</b>	120 Hours of internship work
<b>Minimum Hours/ Semester</b>	120 hours of internship work (Including industrial visit, interactive sessions, applied/training work, examination, preparation etc.)
<b>Review / Revision</b>	-
<b>Implementation Year:</b>	A.Y. 2025-2026
<b>Purpose of Course</b>	NEP-2020 emphasizes on Vocationalization of Education. A key aspect of the new UG programme is its utility into a real life situation. All students are expected to do Internships/Apprenticeships/OJT in a firm, industry, or organization. Students will be provided the opportunities for do Internships/Apprenticeships/OJT with local industry, business organizations, health, and allied areas, local governments (such as panchayats, and municipalities), local Police Stations, Parliament or elected representatives, media organizations, artists, crafts persons, and a wide range of organizations so that students may engage with the practical side of their learning, which will improve their employability.
<b>Course Objective</b>	1) To provide students with practical exposure to industry standards and practices. 2) To foster the application of academic knowledge in real-life work scenarios. 3) To enhance students' interpersonal, communication, and problem-solving skills. 4) To help students identify their strengths and areas of interest in professional domains. 5) To inculcate a sense of responsibility, discipline, and work ethics.
<b>Pre-requisite</b>	Students must have completed at least one year of their undergraduate program. They should have basic conceptual knowledge of their core subjects before starting the internship.
<b>Course Outcomes</b>	1) <b>CO1 (Apply):</b> Apply programming, development, or analytical skills gained in the classroom to solve real-world computing problems during the internship. 2) <b>CO2 (Analyze):</b> Analyze the architecture, workflow, and practices of the host organization to understand the integration of computer systems in business or technical environments. 3) <b>CO3 (Evaluate):</b> Evaluate project requirements, software tools, and technologies used during the internship to recommend improvements or alternative approaches. 4) <b>CO4 (Create):</b> Create a structured technical report and project documentation summarizing the tasks, challenges, and outcomes of the internship. 5) <b>CO5 (Present):</b> Present the project findings and experience effectively using professional communication and presentation skills tailored to the IT/software industry.

	Week 1	01/06/2025– 07/06/2025	Task 1 description	Task 1 completed	e.g., HTML, Python, MySQL	Sig cor
	Week 2					
	...					
	Week N					
<b>Note:</b> The logbook must be signed weekly by the industry/place of internship allocated supervisor and finally verified by the faculty mentor allocated by the institute.
